

SANJANA B S

Bengaluru, India | satannavarsanjana@gmail.com | +91-8073317140

Professional Summary

Computer Science undergraduate specializing in AI & ML with strong frontend development and UI/UX skills. Experienced in building responsive web interfaces, integrating backend APIs, and applying machine learning models in real-world applications. Interested in full-stack and AI-driven product development roles.

Education

Dayananda Sagar University, Bengaluru

Expected May 2027

B.Tech in Computer Science and Engineering (AI & ML) | GPA: 8.54 / 10

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Machine Learning, Artificial Intelligence, Statistics & Applications

Technical Skills

Frontend: React.js, JavaScript, HTML, CSS, UI/UX, Responsive Design, Three.js

Backend: Node.js, Express.js, FastAPI, REST APIs

Databases: MongoDB, MySQL

AI / ML: Applied Machine Learning, Model Integration, Data Processing

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, CI/CD (Basics)

Languages: Java, Python, JavaScript, SQL, C

Projects

AI-Powered Preventive Healthcare Platform

- Built a preventive healthcare platform enabling ML-based disease risk assessment
- Developed responsive patient dashboards with authentication using React
- Integrated FastAPI-based ML services with REST APIs and structured data workflows

InfinityAI — Frontend Lead (AI Platform UI)

- Led frontend development for visualizing AI agent workflows and system states
- Designed interactive dashboards focusing on UX clarity and component architecture
- Integrated frontend with backend AI services using API-driven design

ThreadMill — Advanced Frontend & UI Engineering

- Designed a visually rich, interactive frontend for a modern social media platform
- Implemented advanced UI animations and 3D interactions using Three.js
- Focused on performance optimization and responsive design systems

Property Listing Platform (MERN) — In Progress

- Developing a MERN-based property listing and reservation platform with authentication
- Implementing search, filtering, booking workflows, and RESTful APIs

Research & Applied ML

Personalized Treatment Recommendation System (Genomics)

- Built ML pipelines to predict chemotherapy response using multi-cohort genomic data
- Trained ensemble models (XGBoost, RF, SVM) with SHAP-based explainability

Cross-Lingual Language Processing Using Multi-RAG

- Researched multilingual information retrieval using retrieval-augmented generation
- Improved semantic alignment for low-resource language understanding

Leadership & Activities

- Club Coordinator, DSUXTempete | organized technical and departmental events
- Participated in 24-hour hackathons and collaborative technical challenges
